BAMBOO YARN

Bamboo yarn is made of 100% pure plant-based fiber extracted from bamboo trees. Compared to cotton, it has 70% higher instant absorptive power and it does not cause any skin irritation as its pH level is neutral. With its improved antibacterial effect (by 80%) thanks to the organic acids and amino acids found in bamboo, it helps prevent allergies and atopy. Its texture is as fine as bamboo, and it has diverse functions including deodorization, anion emission and cooling effects.
